

- The work on rolling out my updated computer sign-up system continues. It is now operational at Union Twp. Branch.
- We renewed our service with Syndetics for added content to our library catalog (excerpts, tables of contents, reviews, etc.). This bill of \$948 will be in a future set of bills.
- We've replaced monitors, keyboards, and mice on several computers. We still have quite a few flat panel screens from 2004 that use fluorescent tubes for light. I expect these to continue to fail over the next year or so since 5 years for a fluorescent bulb is generally considered good. All new replacements have LED bulbs, which should last much longer.
