

The Ad-Hoc Public Services Committee met on Friday, February 12, 2016, to discuss how to respond to confirmed incidences of patrons with bedbugs in the future. The committee advised that, per legal advice in the January packet, that bedbugs will be considered a disruption and dealt with in accordance to the library's existing Code of Conduct Policy.

The Acting Director will devise a procedure to implement the Code of Conduct Policy with respect to bedbugs specifically, and will include any information available to inform patrons of best practices to deal with bedbugs, financial support that might be available, tenant rights, and anything else that may be useful to resolving the situation to the benefit of both the Library and the patron.

No additional motions or policies are deemed necessary.
