

Sherwood and Union Twp. Branches are both having issues with the performance and accuracy of their people counters. We have discussed their options and I have recommended they try a different manufacturer than what they currently have. I have recommended the PC-PIR15-D, from a company in Ohio called SenSource (<http://www.sensourceinc.com/PC-PIR15-D.htm>). This is a wireless unit that can be mounted above the door and will hopefully not have the problems with sun coming in the door and messing the sensor up like we have at both locations. This model also features a remote receiver that logs the count and operates as a door chime.

Sherwood needs 1 and Union Twp. needs 2.

Request for Sherwood Branch: \$370 + S&H

(Sherwood's capital fund balance is currently \$8,485.35)

Request for Union Twp. Branch: \$740 + S&H

(Union Twp.'s capital fund balance is currently \$10,358.61)
