

July 2014 Kids' Place

We currently have 485 children ages 2-12 registered with 68 tween/teens. We offer programs every day with some days having 2 programs! To say we're busy is an understatement. Our Monday & Wednesday Science Clubs have been very well-received. In the words of one mother: "My son said science is boring at the beginning of your programs. Now he can't wait for Wednesday." That's what we call successful programming!

Due to the shortage of time this report will be the shortest one on record. We look forward to sharing lots of pictures and fun in our August report.
