

**QUINCY BRANCH CAPITAL REQUEST
December 16, 2016**

The Quincy Branch requests a one-time special circumstance use of capital funds of \$20,000 toward the extensive repairs and increased costs to the building. More would certainly be appreciated. The Quincy Branch currently has over \$80,000 in capital monies.

The estimated \$47,000-\$50,000 has increased \$20,000 at this time due to extensive wood rot and the deteriorated condition of the building. Grand River Builders Incorporated Historic Building Restoration is doing an impeccable job, but the work is continuing.

A restoration committee has been in place and have currently raised \$35,337. The Quincy Township, owners, have a budgeted maintenance allowance in their budget and are working the numbers to see what they can come up with.

The project estimate may certainly increase as they continue to investigate each side of the building. The east side has been completed and the south side has been inspected. There is no wood left on most of the south side. The masonry walls are holding up the roof. The west side may be as dire and the south.
