

One of the two air conditioners at the Bronson Branch is failing and needs to be replaced. Our contract with the township calls for us to “cooperate in the internal maintenance and repair of the facility”. Due to the size of the funding available solely for the benefit of the Bronson Branch (over \$60,000 as of the end of April), and the relatively small price for the repair, the BDL Building Committee recommends that the BDL Board approve to pay the full price of the repair.

The committee recommends that \$5,810 be authorized from the A. Barnett memorial fund to approve the quote from Goods Heating and Air Conditioning in Bronson.
